

Xcelion™ Test Box Kit

Quick start user kit for easy evaluation and integration of Saft's Xcelion 6T battery

Saft's Test Box Kit allows for seamless, out-of-the-box lab performance evaluation and cycling of the Xcelion 6T battery. The Test Box includes a USB memory stick that includes drivers and a user's manual

Key features

- Built-in CAN adaptor compatible with Windows PC USB interface; drivers available online
- Provides visual battery status including state-of-charge, state-of-health, voltage, current, and other diagnostic information
- Configures the Xcelion 6T battery for any of six CAN communications ID's
- In-line graphical user interface (GUI) during vehicle testing/evaluation/integration
- Logs battery data on a PC with GUI to support troubleshooting and interface evaluation
- Communicates over J1939 CAN Bus protocol
- Compatible with MIL-STD-1275E power bus
- UN transportation approved

Benefits

- Accelerates vehicle/battery integration
- Simplifies trouble-shooting and evaluation of the Xcelion 6T battery
- Saves time and resources needed for users to design and build battery interface tools
- Allows for simple enabling and disabling of the Xcelion 6T battery
- Offered as a COTS solution

Applications

- For use with Saft's Xcelion 6T battery
- Initial evaluation and/or integration into a vehicle or other smart system

Physical characteristics

Length	4.2 in
Width	6.5 in
Height	2.5 in
Weight	

Resources included

Users manual
Reprogramming tools
Interface design description
Graphical user interface

Part numbers

Text Box and USB memory stick	208604
Text Box	208559
USB memory stick	208603
