# M 52 CV

## Primary Li-MnO<sub>2</sub> cell

3 V lithium manganese dioxide C-size spiral cell with nickel-plated steel container

Saft's M 52 CV cell is ideally suited for applications requiring high energy with stable voltage under high discharge in - 40°C / + 72°C environment.

#### **Benefits**

- High drain / high pulse capability
- High voltage response, stable during most of the lifetime of the application even after long dormant periods
- High capacity at high current and low temperature
- Low self-discharge compatible with long operating life (less than 1% after 1 year of storage at + 20°C)

#### Key features

- Spiral construction
- Hermetic construction with glass-to metal seal
- Ni-plated steel container
- Integrated safety vent
- Non-corrosive electrolyte
- Non-pressurized at room temperature
- Restricted for transport (Class 9)
- Made in Germany

### Designed to meet all major quality, safety and environment standards

- Safety: IEC 60086-4
- Transport: UN 3090 and UN 3091
- Quality: ISO 9001, Saft World Class continuous program
- Environment: ISO 14001

#### Typical applications

- Radio communications
- Utility Metering
- Alarms and security systems
- ELTs, EPIRBs
- Tracking systems
- GSM/GPRS communication

Electrical characteristics	
(Typical values relative to cells stored up to one year at + 30 °C max)	
Nominal capacity (under 60 mA, + 20 °C, 2.0 V cut-off) <sup>[1]</sup>	5.3 Ah
Open circuit voltage (at + 20 °C)	3.2 V
Nominal voltage (under 1 mA, + 20 °C)	3.0 V
Nominal energy (at 60 mA, + 20°C, 2.0 V cut-off)	15 Wh
Pulse capability (2)	Up to 4.0 A
Maximum recommended continuous current [3]	2.0 A

Operating conditions		
Operating temperature range (4)	-40 °C / + 7;	2 °C (- 104 °F / + 161 °F)
Storage temperatures	Recommended	+ 30 °C (+ 86 °F)
	Allowable $(5)$ -55 °C / + 9	90 °C (- 67 °F / + 194 °F)

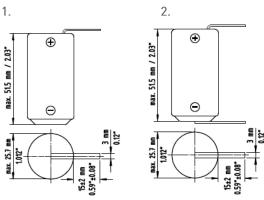

Physical characteristics	
Diameter (max)	25.7 mm (1.01 in)
Height for the tabbed version (max)	51.5 mm (2.03 in)
Typical weight	59 g
Li metal content	approx. 1.6 g

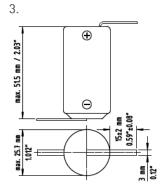

- $^{\mbox{\scriptsize [1]}}$  Dependent upon current drain, temperature and cut-off.
- Dependent upon pulse characteristics, temperature, cell history and application. Higher rates are available under certain circumstances
- <sup>[3]</sup> To maintain cell heating within safe limits. Battery packs may imply lower level of maximum current and may request specific thermal protection. Consult Saft.
- (4) Operating temperatures up to + 85°C can be achieved. Consult Saft.
- $^{{\scriptsize [5]}}$  Long time storage at high temperature may affect performances. Consult Saft.

#### Terminations and part numbers

- 1. + tab (radial tab on positive terminal): 4122070403
- 2. C tab (radial tabs on positive & negative terminals): 4122070203
- 3. Ž tab (radial tabs on positive & negative terminals): 4122070703
- Other configurations available on request

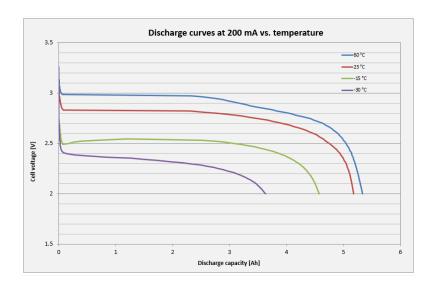

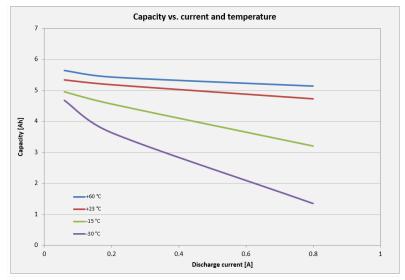

#### Storage

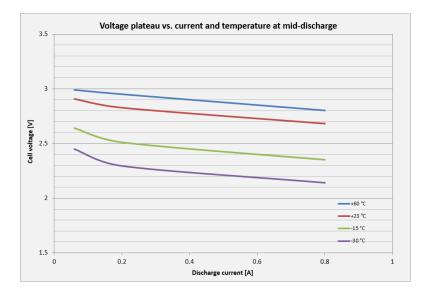

■ The storage area should be clean, cool (preferably not exceeding + 30 °C), dry and ventilated

#### Warning

- Fire, explosion and burn hazard,
- Do not recharge, short circuit, crush, disassemble, heat above + 100 °C (212 °F), incinerate, or expose contents to water
- Do not solder directly to the cell (use tabbed cell versions instead)
- Do not obstruct venting mechanism
